The Little Schemer, fourth edition Aug 07 2021 The notion that "thinking about computing is one of the most exciting things the human mind can do" sets both *The Little Schemer* (formerly known as *The Little LISPer*) and its new companion volume, *The Seasoned Schemer*, apart from other books on LISP. The authors' enthusiasm for their subject is compelling as they present abstract concepts in a humorous and easy-to-grasp fashion. Together, these books will open new doors of thought to anyone who wants to find out what computing is really about. *The Little Schemer* introduces computing as an extension of arithmetic and algebra; things that everyone studies in grade school and high school. It introduces programs as recursive functions and briefly discusses the limits of what computers can do. The authors use the programming language Scheme, and interesting foods to illustrate these abstract ideas. *The Seasoned Schemer* informs the reader about additional dimensions of computing: functions as values, change of state, and exceptional cases. *The Little LISPer* has been a popular introduction to LISP for many years. It had appeared in French and Japanese. *The Little Schemer* and *The Seasoned Schemer* are worthy successors and will prove equally popular as textbooks for Scheme courses as well as companion texts for any complete introductory course in Computer Science.

Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) Nov 10 2021 The long-awaited new edition of NAEYC's book Developmentally Appropriate Practice in Early Childhood Programs is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

Voyaging Under Power, 4th Edition May 24 2020 Originally published in 1975, *Voyaging Under Power* created a revolution in small-boat cruising. Until then, essentially all long-distance cruising was done in sailboats because there simply were no production powerboats capable of crossing oceans. Author Robert Beebes book showed for the first time how to cruise under power, covering boat design, engine selection, outfitting, and operations. The result was the birth of a new market, served by a whole new industry of power cruiser designers, builders, equipment manufacturers, and magazines.

Work the System Aug 27 2020 A simple mindset tweak will change your life. It started with a midnight insight. After a fifteen-year nightmare of coping with his struggling business, Sam Carpenter discovered and then developed a simple methodology that knocked his routine 80-hour workweek down to zero, while multiplying his net income by a factor of 100. Now, in 2021, here's his bestselling business book, revised yet again, showing how you too can instantly break free to build the business and life of your dreams. In this fourth edition of *Work the System*, Carpenter reveals the profound insight and exact uncomplicated, mechanical steps he took to turn his business—and his life—around. Once you "get" this new vision, success and serenity will come quickly. You will learn to: • Make a simple perception adjustment that will change your life forever. • See your world as a logical collection of linear systems that you can control. • Manage the systems that produce results in your business and your life. • Stop fire killing and become a fire-control specialist. • Maximize profit, create client loyalty, and develop enthusiastic employees. • Identify insidious "errors of omission." • Maximize your biological and mechanical "prime time" so that you are working at optimum efficiency. • Design the life you want—and then, in the real world, create it! You can keep doing what you've always done and continue getting unsatisfactory results. Or you can find the peace and freedom you've always wanted by transforming your businesses or corporate department into a finely tuned machine that runs smoothly and profitably on autopilot.
