The remediation of environmental pollutants has become a relevant topic within the field of waste management. Advances in biological approaches are a potential tool for contamination and pollution control. The Handbook of Research on Microbial Tools for Environmental Waste Management is a critical scholarly resource that explores the advanced biological approaches that are used as remediation for pollution cleanup processes. Featuring coverage on a broad range of topics such as biodegradation, microbial dehalogenation, and pollution controlling treatments, this book is geared towards environmental scientists, biologists, policy makers, graduate students, and scholars seeking current research on environmental engineering and green technologies. Using database-driven web pages or web content management (WCM) systems to manage increasingly diverse web content and to streamline workflows is a commonly practiced solution recognized in libraries to-day. However, limited library web content management models and funding constraints prevent many libraries from purchasing commercially available WCM systems. And, the lack of much needed technical expertise in building in-house WCM systems presents a great challenge for libraries of all types. Content and Workflow Management for Library Websites: Case Studies provides practical and applicable web content management solutions through case studies. It contains successful database-to-web applications as employed in a variety of academic libraries. The applications vary in scope and cover a range of practical how-to-do-it examples from database-driven web development, locally created web content management systems, systems for distributing content management responsibilities, dynamic content delivery, to open source tools, such as MySQL and PHP to manage the content. Issues and challenges associated with the development process are discussed. Authors will also discuss detours, sand traps, and missteps necessary to a real learning process. This is the second edition of the undergraduate textbook 'Social Media Management' which extends the original edition's scope beyond the business angle. The textbook continues with the perspective of organizations - not individuals - and clarifies the impact of social media on their different departments or disciplines, while also exploring how organizations use social media to create business value. To do so, the book pursues a uniquely multi-disciplinary approach by embracing IT, marketing, HR, and many other fields. While the first edition was inspired by the rise of social media tools, the second edition is characterized by a digital economy with increasing digitalization efforts due to newly emerging technologies in Industry 4.0 and the COVID-19 pandemic. Readers will benefit from a comprehensive selection of extended topics, including strategies and business models for social media, influencer marketing, viral campaigns, social CRM, employer branding, e-recruitment, search engine optimization, social mining, sentiment analysis, crowdfunding, and legal and ethical issues. Each chapter starts with one or more teaser questions to arouse the readers' interest, which will be clarified per topic. The second edition also provides ample self-test materials and reflection exercises. Widespread use and acceptance of the World Wide Web in the home and office has eclipsed many other technological advances. Next-generation applications like wikis, podcasting, streaming video, virtual reference, RSS feeds, and blogs sit on the cutting edge of changes that will—and have already begun to—transform librarianship. Medical Librarian 2.0 is a vital

groundbreaking resource for understanding and implementing these technologies in reference services. Medical Librarian 2.0 is both an examination of current technology and a resource for practical applications as well. This important collection includes informative chapters that cover the evolving spectrum of digital tools. Through detailed explorations of current technologies, as well as the ways institutions have implemented them to better serve both patrons and staff, this text provides the insight and necessary awareness required for librarians who want to stay current with these technologies and to make their services relevant to the newer generation of users. With a wealth of informative tables, diagrams, Web site illustrations, online resources, photographs, and references, Medical Librarian 2.0 is an essential resource that looks at the pervasive Web technologies medical libraries—and other libraries—are successfully adapting to both update old services and provide new ones. Contributors to Medical Librarian 2.0 discuss:

- the tools and applications shaping Web 2.0
- extending these vibrant technologies into librarianship with Library 2.0
- virtual reference services in academic health science libraries
- e-mail, chat, and web forms in the changing landscape of reference services
- syndicated information delivery via RSS and its integration
- producing, using, organizing, and distributing podcasts
- challenges to and successes of streaming video in health sciences libraries
- social networking, social media sharing, and social bookmarking tools
- tagging, peer production, blogs, and folksonomy
- open source software and content management systems like Drupal
- wikis and the organizational knowledgebase
- creating and utilizing blended applications and mashups
- current concerns over data and security
- and many other important topics!

With a wealth of tables, diagrams, Web site illustrations, online resources, photographs, and references, Medical Librarian 2.0 offers readers clear examples of these applications put into practice. Medical Librarian 2.0 is an essential resource for librarians, especially those in medical settings, library science educators and students, and those looking to stay at the forefront of emerging reference technology. Provides information on ways to identify and evaluate online business information sources and finding company and industry data on the Internet. A new classic updated to provide the following:

- Improved Management Model with new terminology
- New chapters on case classifications in the VR process, rehabilitation caseload in the private sector, and technology
- Section on prime factors for establishing control
- New Service-Decision Model and Rehabilitation-Decision Model

Provides information on a variety of social software, including blogs, RSS, wikis, and instant messaging, and describes ways they can be used to promote library use, language skills, and literacy. Imagine replacing your current online Learning Management System (LMS) with social media and Web 2.0 tools! This book provides a comprehensive and easy-to-understand guide for making the most of the online learning environment. The integration of Web 2.0 tools into an online learning environment requires more than just connecting technology: it involves a paradigm shift from "online learning" to "open network learning." Strategies for Building a Web 2.0 Learning Environment provides a comprehensive and effective guide for teachers and trainers interested in integrating the concept of Personal Learning Environment (PLE) and Open (or Social) Network Learning Environment (ONLE) into any learning environment that utilizes online instruction. Rather than focusing on esoteric theory, the book offers a design model, practical guidelines, and sample activities that are based on current, well-grounded frameworks as well as the author's extensive online teaching experiences and personal research. Classroom teachers, school administrators, online learning researchers, corporate trainers, and corporate administrators will find that the innovative ideas set forth in this book are accompanied by practical guidelines for implementation. Supplies practical guidelines, learning activities, interactive links and templates, and reader-shared resources useful for educators, trainers, and instructional designers Provides information specific to educators regarding the applications of social media in a learning environment Identifies online community resources helpful for implementing Web 2.0 instructional strategies Citation Management Tools: A Practical Guide for Librarians will provide librarians with the essential skills and information required to support the use of citation managers at their libraries, and to explore creative ways to use these tools. This innovative volume comprises a selection of original research articles offering a broad perspective on various dimensions of asset management in an international capital market environment. The topics covered

include risk management and asset pricing models for portfolio management, performance evaluation and performance measurement of equity mutual funds as well as the wide range of bond portfolio management issues. Asset Management and International Capital Markets offers interesting new insights into state-of-the-art asset pricing and asset management research with a focus on international issues. Each chapter makes a valuable contribution to current research and literature, and will be of significant importance to the practice of asset management. This book is a compilation of articles originally published in The European Journal of Finance. This new title explores the role of teaching within the modern university and the impact of the Teaching Excellence and Student Outcomes Framework (TEF). It provides a critical analysis of recent policy reforms designed to increase competition and choice in higher education and what these mean for the sector. It also surveys the wider landscape and the rise of the student as consumer within HE.

RSS and Atom are specifications that give users the power to subscribe to information they want to receive and give content developers tools to provide continuous subscriptions to willing recipients in a spam-free setting. RSS and Atom are the technical power behind the growing millions of blogs on the Web. Blogs change the Web from a set of static pages or sites requiring programming expertise to update to an ever changing, constantly updated landscape that anyone can contribute to. RSS and Atom syndication provides users an easy way to track new information on as many Web sites as they want. This book offers you insight to understanding the issues facing the user community so you can meet users' needs by writing software and Web sites using RSS and Atom feeds. Beginning with an introduction to all the current and coming versions of RSS and Atom, you'll go step by step through the process of producing, aggregating, and storing information feeds. When you're finished, you'll be able to produce client software and Web sites that create, manipulate, aggregate, and display information feeds effectively. "This book is full of practical advice and tips for consuming, producing, and manipulating information feeds. I only wish I had a book like this when I started writing RSS Bandit." - Dare Obasanjo, RSS Bandit creator: <http://www.rssbandit.org/>

Incorporating new methods and approaches in learning environments is imperative to the development of education systems. By enhancing learning processes, education becomes more attainable at all levels. The Handbook of Research on Instructional Systems and Educational Technology is an essential reference source for the latest scholarly research on new models, trends, and data for solving instructional and learning challenges in education. Featuring extensive coverage on a wide range of topics such as distance education, online learning, and blended learning, this publication is ideally designed for academicians, practitioners, researchers, and students seeking current research on the latest improvements in instructional systems. Following on from the continued success of the European Conference on Information Management and Evaluation, we are delighted at the Ted Rogers School of Management, Ryerson University to be able to host the 2nd International Conference on Information Management and Evaluation (ICIME 2011). ICIME aims to bring together individuals researching and working in the broad field of information management, including information technology evaluation. We hope that this year's conference will provide you with plenty of opportunities to share your expertise with colleagues from around the world. This year's opening keynote address will be delivered by Dr Catherine Middleton, Ted Rogers School of Information Technology Management, Ryerson University, Toronto, Canada. This Element provides an overview of cultural entrepreneurship scholarship and seeks to lay the foundation for a broader and more integrative research agenda at the interface of organization theory and entrepreneurship. Its scholarly agenda includes a range of phenomena from the legitimation of new ventures, to the construction of novel or alternative organizational or collective identities, and, at even more macro levels, to the emergence of new entrepreneurial possibilities and market categories. Michael Lounsbury and Mary Ann Glynn develop novel theoretical arguments and discuss the implications for mainstream entrepreneurship research, focusing on the study of entrepreneurial processes and possibilities. Contains extended versions of a selection of papers presented at the workshop Data mining for business, held in 2007 together with the 11th Pacific-Asia Conference on Knowledge Discovery and Data Mining, Nanjing China--Preface. Now you can satisfy your appetite for information This book is not

about the minutia of RSS and Atom programming. It's about doing cool stuff with syndication feeds—making the technology give you exactly what you want the way you want. It's about building a feed aggregator and routing feeds to your e-mail or iPod, producing and hosting feeds, filtering, sifting, and blending them, and much more. Tan-talizing loose ends beg you to create more hacks the author hasn't thought up yet. Because if you can't have fun with the technology, what's the point? A sampler platter of things you'll learn to do Build a simple feed aggregator Add feeds to your buddy list Tune into rich media feeds with BitTorrent Monitor system logs and events with feeds Scrape feeds from old-fashioned Web sites Reroute mailing lists into your aggregator Distill popular links from blogs Republish feed headlines on your Web site Extend feeds using calendar events and microformats How do firms grow? How do firms compete? An influential answer to these fundamental questions of business strategy lies in the concept of dynamic capabilities. David Teece provides a clear statement of his ideas, and a framework for managers wishing to assess their organization's strategy. The five steps of Evidence Based Practice (EBP) provide the foundation for this book that supports student learning to find, appraise, and apply evidence to improve patient outcomes. You will develop evidence-based questions specific to your clinical decisions and conduct efficient and effective searches of print and online sources to identify the most relevant and highest quality research evidence. Then, you learn to rigorously appraise and interpret the research and combine the research with your clinical expertise and your patients' values and goals. In this helpful book, author, Internet trainer, and blogger Michael P. Sauers, MLS, shows how blogging and RSS technology can be easily and effectively used in the context of a library community. Sauers covers everything librarians need to know, beginning with an introduction to the blogging phenomenon and a review of the library "blogosphere." He recommends his favorite blogs, shares the opinions and advice of top librarian bloggers, and offers step-by-step instructions for creating, publishing, and syndicating a blog using free Web-based services, software, RSS feeds, and aggregators. A recommended reading list, examples of feed code, and a glossary round out the book. Book jacket. This volume brings together advanced concepts from leading academic scientists, educationalists, administrative policymakers, and researchers on their experiences and research results on many aspects of digital educational methods and teaching practices. It provides an interdisciplinary compilation of recent innovations, trends, and concerns as well as the challenges encountered and solutions adopted in the fields of digital pedagogies and educational design. It is becoming increasingly important to develop adaptive, robust, scalable, and digital teaching-learning mechanisms in academics. This volume addresses this need by discussing the advancements in flipped and blended learning, student- and teacher-centric learning in technical institutes, critical digital pedagogies, and the complex analyses and collaborations with organizations outside the academy. This book also deals with protocols for educational and administrative policies, IoT-based teaching-learning methodology, teaching education and the process of assessment, testing and evaluation, integration of technology with digital education, and different case study-based approaches in digital teaching-learning methodology. This issue of Library Technology Reports draws from 17 in-depth interviews to show how libraries are using social media to collect, organize, share, and interpret—in short, how to tell a digital story. Tourism Management: managing for change is a complete synthesis of tourism, from its beginnings through to the major impacts it has on today's global community, the environment and economy. Provocative and stimulating, it challenges the conventional thinking and generates reflection, thought and debate. This bestselling book is now in its third edition and has been fully revised and updated to include complete set of brand new case studies, a new four colour page design to enhance learning and improved online companion resources packed with must have information to assist in learning and teaching. Tourism Management covers the fundamentals of tourism, introducing the following key concepts: \* The development of tourism \* Tourism supply and demand \* Sectors involved: transport, accommodation, government \* The future of tourism: including forecasting and future issues affecting the global nature of tourism In a user-friendly, handbook style, each chapter covers the material required for at least one lecture within a degree level course. Written in a jargon-free and engaging style, this is the ultimate student-friendly text, and a vital introduction to

this exciting, ever-changing area of study. The text is also accompanied by a companion website packed with extra resources for both students and lecturers, including learning outcomes for each chapter, multiple choice questions, links to sample chapters of related titles and journal articles for further reading, as well as downloadable PowerPoint materials and illustrations from the text. Accredited lecturers can request access to download additional material by going to <http://textbooks.elsevier.com> to request access. Thought-provoking perspectives from experts in library serials! Roaring Into Our 20's: NASIG 2005 presents leading authorities in library serials providing their unique perspectives on the challenges of serials collection development and management, as well as their promising visions for the future. Marshall Keys, Regina Romano Reynolds, Steve Shadle, Carol Hixson, Paul Weiss, and a host of other top experts in serials gathered as presenters for the milestone twentieth anniversary conference of the North American Serials Interest Group (NASIG) held in May 2005 in Minneapolis, Minnesota. The latest issues and thought-provoking strategies are explored, giving librarians of all types a firm grasp of the newest products and most effective tactics to best manage serials today—and tomorrow. The conference itself consisted of preconference programs, vision sessions, strategy sessions, and tactics sessions not only to provide goals for the future, but also to examine ways to help librarians become more effective in handling the constantly evolving challenges of serial management. Roaring Into Our 20's: NASIG 2005 discusses a broad selection of topics of crucial interest, including electronic resources, vendors, financial issues, the development of new products and services and other topics exploring the bright and challenging future of library serials. Several chapters include tables and figures to enhance the clarity of ideas. Topics in Roaring Into Our 20's: NASIG 2005 include: FRBR (Functional Requirements for Bibliographic Records) ISSN revision cross-provider search institutional depositories e-journal management OpenURL Big Deals cancellation projects RSS the AACR3 development process Roaring Into Our 20's: NASIG 2005 is a horizon-expanding collection that is perfect for librarians, publishers, and commercial vendors interested in the future of serial publication. Information literacy and library instruction are at the heart of the academic library's mission. But how do you bring that instruction to an increasingly diverse student body and an increasingly varied spectrum of majors? In this updated, expanded new second edition, featuring more than 75% new content, Ragains and 16 other library instructors share their best practices for reaching out to today's unique users. Readers will find strategies and techniques for teaching college and university freshmen, community college students, students with disabilities, and those in distance learning programs. Alongside sample lesson plans, presentations, brochures, worksheets, handouts, and evaluation forms, Ragains and his contributors offer proven approaches to teaching students in the most popular programs of study, including English Literature Art and Art History Film Studies History Psychology Science Agricultural Sciences and Natural Resources Hospitality Business Music Anthropology Engineering Coverage of additional special topics, including legal information for non-law students, government information, and patent searching, make this a complete guide to information literacy instruction. When initially published in 2005, the two-volume Encyclopedia of Public Relations was the first and most authoritative compilation of the subject. It remains the sole reference source for any library serving patrons in business, communication, and journalism as it explores the evolution of the field with examples describing the events, changing practices, and key figures who developed and expanded the profession. Reader's Guide topics include Crisis Communications & Management, Cyberspace, Ethics, Global Public Relations, Groups, History, Jargon, Management, Media, News, Organizations, Relations, Reports, Research, and Theories & Models. Led by renowned editor Robert L. Heath, with advisory editors and contributors from around the world, the set is designed to reach a wide array of student readers who will go on to serve as opinion leaders for improving the image and ethics of the practice. The Second Edition continues to explore key challenges facing the profession, such as earning the trust and respect of critics and the general public. Much greater emphasis and space will be placed on a theme that was just emerging when the First Edition appeared: the Internet and social media as public relations tools. International coverage and representation has been greatly expanded, as well. Finally, biographies (which are now widely available on the Web) have been deleted

to give room to areas of enhanced coverage, and biographical material are included where appropriate within the context of topical entries. However, a long entry on women pioneers in public relations has been included as an appendix. Covers the development, design, and utilization of virtual organizations and communities and the resulting impact of these venues. Social media and online social networks are expected to transform academia and the scholarly process. However, intense emotions permeate scholars' online practices and an increasing number of academics are finding themselves in trouble in networked spaces. In reality, the evidence describing scholars' experiences in online social networks and social media is fragmented. As a result, the ways that social media are used and experienced by scholars are not well understood. *Social Media in Academia* examines the day-to-day realities of social media and online networks for scholarship and illuminates the opportunities, tensions, conflicts, and inequities that exist in these spaces. The book concludes with suggestions for institutions, individual scholars, and doctoral students regarding online participation, social media, networked practice, and public scholarship. With the advent of the information and communication technologies, traditional library activities are undergoing transformation in a big way. Modern library's collection includes a vast array of information resources, databases, electronic journals, e-books, digital images, institutional repositories etc. To manage a modern library, library professionals need to have awareness and knowledge on management of electronic resources, federated and discovered tools for single click search, literature techniques, application of RFID and other technologies, user needs and knowledge on soft skills etc. Keeping these perspectives and issues in mind the National Conference on Management of Modern Libraries (NACML) was organized by SEARCH- The health science library in association with the department of Library and Information Science, Manipal University, Manipal. The main objective of the conference was to provide an opportunity to LIS professional to explore the ways and means to manage the modern libraries where electronic resources are playing an important role in meeting the information needs of the users and to explore, discuss and share ideas and knowledge related to innovative modern library management systems to meet the needs of the changing environment. In five technical sessions under five different categories titled Technologies for Management, Best Practice in Modern Libraries, digital libraries and Role of Library Professionals in Management of Modern Libraries held over the two days, total 51 papers were presented at the conference. Various challenges and issues related to management of modern libraries were discussed in the technical sessions and some of the authors shared the best practices of their libraries. The author highlighted the importance of digital libraries and stressed the needs of various skills to work in digital environment. The papers presented in the conference have been edited and brought out in the form of a conference proceedings. Integrating new technologies into existing library services is the key to meeting user needs. Newest in the renowned series from the Library and Information Technology Association (a division of the American Library Association), this cutting-edge guide provides practical advice, detailed examples, implementation ideas, and helpful forecasts for the future roles of four major interactive technologies. Librarians will find helpful information on: using Real Simple Syndication (RSS) for providing data based on disciplinary interests and across vendor platforms; developing Wikis as a replacement for static HTML pages to provide greater currency in subject guides - without the need for librarians to develop Web-authoring skills; implementing blog feeds to meet real needs such as library instruction for distance-education students; and employing podcasting as an alternate method. There is now widespread understanding that business and management must evolve and act responsibly in the world giving full consideration to people and planet, not just profit. *Principles of Management: Practicing Ethics, Sustainability, Responsibility* was the first official textbook of the United Nations global initiative network, Principles for Responsible Management Education (PRME). Now fully revised and updated with three brand new chapters on communicating, innovating and leading, this accessible and engaging textbook provides an introduction to management while empowering you to think ethically and sustainably in order to become a responsible manager. It also includes essential workplace skills for the 21st century and coverage of the various management occupations that you will go on to fill after your studies. Exclusive interviews with management pioneers and professionals help bring theories and

concepts to life throughout the text as do the all new case studies which include Lego, Patagonia and Greta Thunberg. Worksheets and exercises make for an active learning experience alongside the supporting online resources provided to your lecturer for dissemination. The textbook includes coverage of the UN's Sustainable Development Goals (SDGs) which are central to business education and practice today. It can be used for introductory management courses as well as courses that cover business ethics, business and society, corporate social responsibility (CSR), sustainability and responsible management. So you have a business and you have a Web site. Bravo! You're doing all the right things to be successful. But wait — the information on your Web site needs to be updated, and your customers need to know. Good heavens, didn't you spend half of last week doing that? There's got to be a quicker, easier way to keep your clientele informed, and while we're at it, how about building your business too? RSS can come to your rescue, but first you need to know what it is and how to use it. *Syndicating Web Sites With RSS Feeds For Dummies* has what you need to know to get up and running fast—and with today's flood of constantly-changing information, "fast" is a top priority. Here, in plain English, you'll find out how to: Use RSS to drive traffic to your Web site and build brand awareness Choose and install the right software, set up RSS feeds, and decide on the format that meets your needs Create RSS feeds from scratch, or put a news reader on your Web site Improve your site's ranking in search engines and build customer loyalty Enable your customers to choose when and how they receive updated information Tailor information for your audience and publish all your updates quickly and easily Promote your RSS feed and explain to your customers how to use it Provide added value for your customers Making the most of RSS can make life easier for both you and those who do business with you. *Syndicating Web Sites With RSS Feeds For Dummies* will help you maintain fresh content for your Web site, blog, or e-zine, promote your site and establish links to it, and even update vital documents like employee guides, price lists, and procedures manuals, quickly and easily. *Health Informatics (HI)* focuses on the application of Information Technology (IT) to the field of medicine to improve individual and population healthcare delivery, education and research. This extensively updated fifth edition reflects the current knowledge in Health Informatics and provides learning objectives, key points, case studies and references.
